Volume 45, 1990, Numbers 1–3

CONTENTS

Number 1 PAGE

Molecular genetics of the P-450 superfamily: *F. J. Gonzalez* 1
The cardioselectivity of beta adrenoceptor antagonists: *T. H. Pringle and J. G. Riddell* 39
Pharmacogenetics of alcohol dehydrogenase (ADH): *D. P. Agarwal and H. W. Goedde* 69
Factors influencing the metabolism of diazepam: *L. Bertilsson, T. A. Baillie and J. Reviriego* 85
Sulfotransferase pharmacogenetics: *R. Weinshilboum* 93
Drug interactions with calcium antagonists: *W. Kirch, C. H. Kleinbloesem and G. G. Belz* 109
Interferon-γ: Producer cells, activation stimuli, and molecular genetic regulation: *H. A. Young and K. J. Hardy* 137

Number 2

Purification and characterization of hepatic microsomal cytochrome P-450: *D. E. Ryan and W. Levin* 153
Enzyme induction in the cytochrome P-450 system: *A. B. Okey* 241

Number 3

Purification and characterization of xenobiotic-metabolizing enzymes from lung tissue: *F. P. Guengerich* 299
Enantiomer specific pharmacokinetics: *G. T. Tucker and M. S. Lennard* 309
Flumazenil: Potential implications for hepatic encephalopathy: *E. A. Jones, A. S. Basile, K. D. Mullen and S. H. Gammal* 331
Pharmacogenetics of aldehyde dehydrogenase (ALDH): *H. W. Goedde and D. P. Agarwal* 345
Treatment of chronic hepatitis B infection: *J. Main and H. C. Thomas* 373
Protection against free radical injury by selenoenzymes: *R. F. Burk* 383
Genetic polymorphism of trimethylamine N-oxidation: *R. Ayesh and R. L. Smith* 387
Effects of drugs on punished behavior: Pre-clinical test for anxiolytics: *G. T. Pollard and J. L. Howard* 403
Animal models of depression: An overview: *P. Willner* 425
